

## **T3 Motion Expands the International Footprint of the T3 Series Clean Energy, Green Electric Vehicle into Korea**

***Sunny Electronics Corporation, the Distributor for Korea, Received Initial 20 Units of T3 Series Electric Stand-Up Vehicles***

**Costa Mesa, CA (November 3, 2010) (OTCBB:TMMM)** - T3 Motion, Inc. has expanded its international footprint through its partnership with Sunny Electronics Corporation, of Korea, the newest distributor of the iconic T3 i-Series Electric Stand-up Vehicle (ESV) designed for international law enforcement and security markets. Sunny Electronics Corporation will exclusively distribute the T3 i-Series in Korea.

The exclusive distribution agreement with Sunny Electronics Corporation provides for multiple T3 i-Series Electric Stand-up Vehicles of which, T3 Motion, Inc. has shipped an initial twenty units.

**T3 Series Electric Stand-up Vehicle at Coex Convention Center, in Seoul South Korea**

“Sunny Electronics Corporation is extremely proud to partner with T3 Motion, Inc. to distribute the revolutionary T3 i-Series Electric Stand-up Vehicle in Korea. Korea represents a fantastic opportunity and growing market for clean technology. The T3 i-Series is essential in the overall enhancement of our law enforcement and security agencies, especially to increase their command presence while reducing their costs. The ability to keep our cities, events, and locations safer with the deployment of T3 i while producing zero-gas emission is a win-win scenario for our company and security customers throughout the region. I look forward to a positive response to this environment-friendly technology which opened the doors to the ‘green’ energy industry for our company,” said Sean Gwak, CEO of Sunny Electronics Corporation.

“Since 2006, our long-term market strategy includes expanding our clean energy, electric vehicle footprint to the international marketplace and Korea represents a vast business opportunity. Since the early 1990s, the Korean marketplace has established itself as an innovator and early adopter in technology and wireless telecom applications. Our partnership with Sunny Electronics Corporation is another example of this forward-thinking business strategy. Our T3 i-Series Electric Stand-up Vehicles are ideal for international public safety applications around the world. With Sunny Electronics Corporation, we look forward to bringing cost-effective, zero-gas emission and clean energy vehicles to Korea,” said Ki Nam, T3 Motion, Inc. C.E.O.

### **T3 i-Series Features**

The cutting-edge “green” technology provides an incomparable low cost of operation—running for less than 10 cents per day and never requiring any down time due to the T3 i’s two re-chargeable, lightweight batteries which can be easily swapped out while in-use. This 24/7 power flexibility provides for continual deployment to support an unlimited range.

- High-performance vehicle with a zero-degree turning radius for improved maneuverability in crowds and tight spaces
- Two rechargeable and interchangeable lightweight power modules for constant 24-hour use without down time
- Capable of reaching speeds up to 20 M.P.H [32 K.P.H.] for quick response without officer or personnel fatigue
- An instinctive vehicle with easy-to-operate controls and responsive steering that allows officers and security personnel to focus on response to the situation
- A 9-inch raised platform provides a superior vantage point while still allowing for interaction with the community.
- Robust cargo capacity of 450 pounds [204 kg] (rider plus equipment) includes the ability to tow personnel and equipment/cargo trailers
- A highly effective patrol tool that enables increased patrol areas, and response times, while also focusing on cost reduction and clean energy
- Optional GPS-enabled tracking system
- Optional Motiontrak 300<sup>SM</sup> on-board video camera system [www.motiontrak.com](http://www.motiontrak.com)

### **About T3 Motion, Inc.**

T3 Motion, Inc. (OTC BB: TMMM) revolutionized the world of personal mobility with the introduction of their flagship electric T3 Series law enforcement vehicles at the International Association of Chiefs of Police conference held in October 2006. Headquartered in Orange County, California, T3 Motion, Inc. is dedicated to raising the bar on environmental standards and law enforcement and security capabilities in personal mobility technology.

In June of this year, T3 Motion unveiled the GT3 plug-in electric consumer vehicle. The proprietary rear-wheel design of the GT3 features a patent-pending, single, wide-stance wheel with two high-performance tires sharing one wheel. The revolutionary two-tire design improves traction, stability, and handling, while the low rolling resistance and rounded profile of the rear tires increase energy efficiency. The GT3 will incorporate the Apple® iPad™ into the sleek dashboard design. Due to its three-wheeled design, the GT3 is classified as a motorcycle.

T3 Motion's Motiontrak 300<sup>SM</sup> is a "black box" in-car video and data recording system ([www.motiontrak.com](http://www.motiontrak.com)). Data monitored by Motiontrak 300<sup>SM</sup> include vehicle speed, location, and g-force shocks. Built-in GPS capability is integrated with Google Maps to track precise location and provide a vehicle movement overview. Sophisticated software enables the user to see video footage from the vehicle's perspective, overhead Google Earth location display, and numeric as well as graphical data on a single screen.

For more information on T3 Motion, Inc. and the company's signature T3 Series line of electric personal mobility vehicles, the electric CT Series Micro Car, and the upcoming GT3 consumer vehicle, visit [www.t3motion.com](http://www.t3motion.com), email [sales@t3motion.com](mailto:sales@t3motion.com) or call 714-619-3600.

## **About Sunny Electronics Corporation**

Sunny Electronics Corporation (The Group) principal activities are manufacturing of electronic parts for telecommunication equipment. It produces crystal units, crystal oscillators, as well as filters such as surface mount device type, saw devices, and tapes and reels, which are used in televisions, computers, monitors, telecommunication equipment, and measuring instruments.
