

## **T3 Motion Receives New Order for 21 T3 Series ESVs from Leading Private Security Firm ERMC**

*T3 Series Electric Vehicle Provides Significant Benefits  
in Command Presence, Productivity, Cost Reduction and Environmental Impact*

**Costa Mesa, CA (May 18, 2010)** – T3 Motion, Inc. (OTCBB: TMMM, [www.t3motion.com](http://www.t3motion.com)), a leader in cost-effective, clean-technology electric vehicles, has received a significant new order for 21 of its iconic T3 Series electric standup vehicles from ERMC, one of the world's leading private security companies. This repeat order from ERMC is based on the confidence T3 Motion has built in its ability consistently to deliver high product reliability, significant cost savings and tangible environmental benefits.

ERMC is a multi-discipline facilities services company serving a wide variety of industries. The new T3 Series ESVs will be deployed to several locations in 14 states, primarily for security patrols at retail shopping malls in the Southeast and Midwest regions of the country. According to ERMC, a primary benefit of the T3 Series is reduced fuel costs for security patrols. With each T3 Series deployed, the company can retire an expensive-to-operate gasoline powered automobile. They also report other important advantages as well and see the T3 Series as a valuable asset for the security solutions provided to their clients.

“The first and most obvious advantage is the savings in fuel. Secondly, the T3 Series can get into places that a patrol car cannot. It is a far more flexible vehicle for getting around crowded parking lots and for patrolling areas where the driver of a patrol car would have to exit the car,” said Rodney Jackson, Vice President of Security for ERMC. “In addition, the operator of the T3 Series is higher up than a seated driver, which puts him or her in a much better position to see what is going on. Our security force also reports that 99% of the pedestrians notice an officer on the T3 Series. Plus, our response time to an incident is much faster.”

“Based on our strong success with the T3 Series in law enforcement agencies, the private security market has become a rapidly growing segment of our customer base,” said T3 Motion CEO Ki Nam. “Our relationship with ERMC exemplifies the valued partnerships we have established as a provider of innovative clean-energy vehicles that meet the needs of a wide range of security applications.”

In addition to cost savings, the electric T3 Series delivers significant reductions in carbon footprint through its extremely energy-efficient design compared to traditional fossil-fueled vehicles. In fact, one company that has deployed some 100 T3 Series ESVs nationwide expects to see its carbon footprint reduced by over five tons annually. T3 Motion estimates that this company will also save \$3.2 million over three years by replacing dozens of gasoline-powered vehicles.

The T3 Series is designed, manufactured, assembled and tested in the USA (Costa Mesa, CA). It features a zero-degree turning radius and a compact design, perfect for maneuvering through crowds and tight spaces, with speeds up to 20 mph. Also unique to the T3 Series is the most user-friendly and intuitive operation in a vehicle of its kind, giving the rider a sense of superior stability and command presence.

The quiet, environmentally friendly, zero-gas-emission vehicles include an integrated LED lighting system and an incomparable low cost of operation. They can run for less than 10 cents per day without requiring downtime due to the vehicle's two rechargeable, lightweight batteries (Power Modules) that can be easily swapped out while in use for continual deployment and an unlimited range.

The T3 Series is also constructed with the latest environmentally friendly materials and techniques. Each vehicle is built using a lead-free assembly process, printed circuit board assemblies, paint and cover coats as well as recyclable polycarbonate blend plastics, metals and tires.

**About T3 Motion, Inc.**

T3 Motion, Inc. (OTCBB: TMMM) specializes in cost-effective, clean-technology vehicle solutions for professional markets including law enforcement, security, retail, government and the military. The company is dedicated to raising the bar on vehicle environmental standards and green energy solutions. In 2006, T3 Motion revolutionized the world of personal mobility with the introduction of its flagship T3 Series electric standup (ESV) vehicle. The foundation of T3 Motion vehicles is the company's proprietary power management technology that maximizes range and minimizes recharging time. T3 Motion is headquartered in Costa Mesa, California. For information, email [sales@t3motion.com](mailto:sales@t3motion.com), call 714-619-3600 or visit [www.t3motion.com](http://www.t3motion.com).
