## **T3 Motion Participates in Green Tech Connect Forum as Presenter, Exhibitor and Sponsor**

*Event Assembles Key Stakeholders to Expedite Development  
of Low-Emission Technologies*

**Costa Mesa, CA (August 13, 2009)** – T3 Motion, Inc. ([www.t3motion.com](http://www.t3motion.com)), a leader in all-electric, clean technology vehicles, participated as a presenter, exhibitor and sponsor at the Green Tech Connect Forum held Aug. 3-4, 2009 at the Pasadena Convention Center in Pasadena, Calif. The forum was hosted by the South Coast Air Quality Management District, the air pollution control agency for all of Orange County and the urban portions of Los Angeles, Riverside and San Bernardino counties. The goal of the event was to bring together environmental stakeholders, including clean-tech developers and investment companies to expedite the introduction of new, low-emission technologies needed to produce both economic and environmental benefits.

During the “Off-Road” session, T3 Motion CEO Ki Nam delivered a presentation on the use and benefits of its all-electric, three-wheel T3 Series vehicles in applications such as college campuses, shopping malls, airports, ports and special events. Nam noted that, while most of today's green program requires government incentives or funding to succeed, the utilization of T3 Motion electric vehicles is due primarily to the ability to achieve short-term ROI due to reduced energy costs, which can be as low as 10 cents per day. The audience for Nam's presentation included city/county/state officials, fleet managers, port authority representatives, airport personnel, investors and other green-tech-related companies.

On the exhibit floor, T3 Motion showcased its T3 Series vehicles as well as its innovative CT Micro Car. Both vehicles achieve significant clean energy efficiencies through T3 Motion's proprietary power management and battery technologies. In addition, both vehicles feature a wide range of performance, security and comfort features.

T3 Motion was also a sponsor of the forum along with other industry leaders such as Chevron, Energy Star, Southern California Edison and Toyota. The event also provided an opportunity for the company to interact with leading clean-tech investment companies including Kleiner Perkins Caufield & Byers; Khosla Ventures; Rustic Canyon Partners; Angeleno Group; and Craton Equity Partners.

**About T3 Motion, Inc.**

T3 Motion, Inc. specializes in cost-effective, clean technology vehicle solutions for professional markets including law enforcement, security, retail, government, and the military. The company is dedicated to raising the bar on vehicle environmental standards and green energy solutions. In 2006, T3 Motion revolutionized the world of personal mobility with the introduction of its flagship T3 Series electric stand-up (ESV) vehicle. The foundation of T3 Motion vehicles is the company's proprietary power management systems that maximize range and minimize recharging time. T3 Motion is headquartered in Costa Mesa, California. For information, email [sales@t3motion.com](mailto:sales@t3motion.com) or call 714-619-3600.
