Costa Mesa, CA (February 1, 2010) - T3 Motion, Inc. (OTC BB: TMMM) is proud to announce the deployment of over 5,000 T3 Motion clean energy Lithium-ion batteries (Power Modules) throughout the world. The T3 Motion Power Management system utilizes Lithium-ion battery technology and is at the core of the iconic T3 Series Electric Stand-up Vehicle (ESV). The T3 Series batteries can be “hot-swapped” in less than a minute, enabling Law Enforcement, Security, and Military customers multi-shift, 24-7 operation with just one vehicle. This revolutionary power management approach can reduce operating costs, increase efficiency, and is capable of up to a 50-mile range while recharging in just two to three hours, either on-board or off-board.

Since its launch in 2006, the T3 Series ESV and its proprietary power management system have become a daily tool for public safety, government, and security applications for over 500 agencies such as L.A.P.D., Miami-Dade Police Department, Dallas P.D., U.S. Navy, U.S. Army, U.S. Air Force, Royal Canadian Mounted Police, Acapulco Police, Target, Simon Property Group, as well as the U.S.P.S.

“We are very proud of our role as a major international supplier of clean energy power solutions,” said Ki Nam, T3 Motion, Inc. C.E.O. “Since the launch of our T3 Series ESV in 2006, we have utilized Lithium-ion technology to give our vehicles tremendous range and fast recharge times. Our T3 Motion Power Management System with swappable power modules means that range no longer has to be an issue with electric vehicles. The cost-effective T3 Series redefines what it means to be an electric vehicle.”

About the T3 Series ESV:

Reaching speeds up to 20 m.p.h. and designed with the input of law enforcement and security industry professionals, the T3 Series features a zero-degree turning radius and compact design—perfect for maneuvering through crowds and tight spaces. Also unique to the T3 Series is the most user-friendly intuitive operation of its kind, giving the rider a sense of superior stability and command presence.

The quiet, environmentally friendly zero gas emission vehicles include an integrated LED lighting system and an incomparable low cost of operation—running for less than 10 cents per day and never requiring any down time due to the T3’s two re-chargeable, lightweight batteries (Power Modules) that can be easily swapped out while in-use for continual deployment and an unlimited range.

About T3 Motion, Inc.:

T3 Motion, Inc. (OTCBB: TMMM) revolutionized the world of professional grade vehicles with the introduction of their flagship clean energy electric T3 Series law enforcement vehicles at the International Association of Chiefs of Police conference in October 2006.

Headquartered in Orange County, California, T3 Motion, Inc. is dedicated to raising the bar on environmental standards as well as law enforcement and security capabilities through clean technology. For more information on T3 Motion, Inc. and the company's signature alternative energy T3 Series Electric Stand-up Vehicles (ESVs), the CT Micro Car, and the upcoming CT3 consumer vehicle, visit www.t3motion.com or call (714) 619-3600.
