T3 Motion Announces Target National Deployment of T3 Personal Mobility Vehicles for Assets Protection Patrols

Costa Mesa, CA (September 23, 2009)—T3 Motion, Inc. (OTC BB: TMMM), a leader in all-electric, clean-technology vehicles, today announced a partnership with Target, one of the world's largest retailers, for nationwide deployment of T3 Series personal mobility vehicles at more than 100 Target stores. Target Assets Protection team members will leverage these vehicles to help provide safe and secure parking lots at their stores throughout the U.S.

The all-electric T3 Series vehicles are extremely cost effective, produce zero gas emissions and are solely designed for professional security and public safety applications.

The dynamic relationship between Target and T3 Motion also includes mutual strategic sponsorships of the national "Safe City" Foundation, which creates partnerships among law enforcement, business and community organizations to proactively reduce crime.

"We are tremendously excited to partner with Target for the deployment of our T3 Series vehicles for parking lot patrols and to join them in the 'Safe City' program," said Brian Buccella, Vice President of Sales and Marketing for T3 Motion, Inc.

"We are proud of this partnership," said Cory Birkemeyer, Director of Assets Protection for Target. "Target's priority is the safety and security of our guests and team members. T3 technology increases our visibility as we patrol store parking lots across the country and is well received by our guests. Additionally, the Safe City program strengthens our communities while reducing common crimes."

Reaching speeds up to 25 mph and designed with the input of law enforcement and security industry professionals, the T3 Series features a zero-degree turning radius and compact design—perfect for maneuvering through crowds and tight spaces. Also unique to the T3 Series is the most user-friendly, intuitive operation of its kind, giving the rider a sense of superior stability and allowing them to respond to situations without distraction.

The quiet, environmentally friendly, zero gas emission vehicles include an integrated

LED lighting system and an incomparable low cost of operation. The T3 runs for less than 10 cents per shift and never requires any down time due to the its two rechargeable, lightweight batteries that can be easily swapped out while in use for continual deployment and an unlimited range.

Additional features of the T3 Series include a 9-inch raised platform providing a superior vantage point while allowing interaction with bystanders, a robust cargo capacity of 450 pounds (rider and equipment) including the ability to tow personnel and equipment/cargo trailers, and an external cargo/equipment rack with hard cases to transport an additional 200 pounds. For law enforcement and security applications, the T3 Series also offers an integrated LED lighting system; fully-compliant headlights, brake lights and running lights; sirens; a secure glove box for storage, and an optional GPS-enabled tracking system.

About T3 Motion, Inc. (OTC BB: TMMM)

T3 Motion, Inc. revolutionized the world of personal mobility with the introduction of its flagship T3 Series law enforcement vehicles at the International Association of Chiefs of Police conference in October 2006. Headquartered in Orange County, Calif., T3 Motion, Inc. is dedicated to raising the bar on environmental standards and law enforcement, security, government/military, first responder and parcel delivery capabilities in personal mobility technology. For more information on T3 Motion, Inc. and the company's signature T3 Series line of personal mobility vehicles visit www.t3motion.com or call (714) 619-3600.
