

## **T3 Series Electric Vehicle Chosen as Finalist in TechAmerica Orange County's 17<sup>th</sup> Annual High-Tech Innovation Awards**

*Clean-Energy Innovation Provides Significant Benefits Worldwide  
in Productivity, Cost Reduction and Environmental Impact*

**Costa Mesa, CA (May 13, 2010)** – The revolutionary T3 Series electric standup vehicle (ESV) by T3 Motion, Inc. (OTCBB: TMMM, [www.t3motion.com](http://www.t3motion.com)), a leader in cost-effective, clean-technology electric vehicles, has been selected as a product finalist for TechAmerica Orange County's 17th Annual High-Tech Innovation Awards. T3 Motion and its iconic T3 Series ESV were selected as an exemplary representation of Orange County's tech-innovation community.

One of Orange County's longest standing and most prestigious high-tech/business functions with over 100 nominations received this year, the program acknowledges and celebrates people and companies working in the trenches of technology that are integral to the innovation and success of groundbreaking products. Winners of awards in several technology innovation categories will be announced at a special dinner event at the Hyatt Regency Hotel in Irvine, Calif., on June 2, 2010.

“We are very pleased to have been chosen as a finalist for this prestigious awards program. And we are proud to have maintained all our engineering, manufacturing and assembly right here in Orange County,” said T3 Motion CEO Ki Nam. “Southern California is an ideal environment for technology development with a highly educated workforce, excellent supplier partners and access to world markets.”

The T3 Series ESV is deployed worldwide in a broad range of applications, delivering major benefits in terms of dramatic energy cost savings, increased productivity and enhanced community relations.

The T3 Series has brought significant reductions in carbon footprint through its extremely energy-efficient, electric vehicle design compared to traditional fossil-fuelled vehicles. A major shopping mall property management company has deployed some 100 T3 Series ESVs nationwide and expects to see its carbon footprint reduced by over five tons annually. T3 Motion estimates that this customer will also save \$3.2 million over three years by replacing dozens of gasoline-powered vehicles. Another has seen incidents in its parking lots drop by 60 percent since deploying the T3 Series.

The environmentally friendly, zero-gas-emission vehicles include an integrated LED lighting system. They can run for less than 10 cents per day without requiring downtime due to the vehicle's two rechargeable, lightweight batteries (Power Modules) that can be easily swapped out while in use for continual deployment and an unlimited range.

**About T3 Motion, Inc.**

T3 Motion, Inc. (OTCBB: TMMM) specializes in cost-effective, clean-technology vehicle solutions for professional markets including law enforcement, security, retail, government and the military. The company is dedicated to raising the bar on vehicle environmental standards and green energy solutions. In 2006, T3 Motion revolutionized the world of personal mobility with the introduction of its flagship T3 Series electric standup (ESV) vehicle. The foundation of T3 Motion vehicles is the company's proprietary power management technology that maximizes range and minimizes recharging time. T3 Motion is headquartered in Costa Mesa, California. For information, email [sales@t3motion.com](mailto:sales@t3motion.com), call 714-619-3600 or visit [www.t3motion.com](http://www.t3motion.com).
